

SWEETWATER SPRINGS WATER DISTRICT

2020 FLUSHING SCHEDULE

Sweetwater Springs Water District will soon be flushing the water lines. Flushing can temporarily cause your water to lack pressure and/or be discolored. If your water is discolored as a result of the District's flushing process, run an outside faucet at full pressure until it clears up. This should be done **after** flushing by the District is completed in your area. It should take no more than 5-10 minutes to clear. We also recommend that you flush your water heater at this time.

Look for the dates in 2020 that the District plans to flush the water lines in your neighborhood.* Flushing hours are from 8 a.m. - 4 p.m.

We regret this inconvenience, but this maintenance program should improve water quality in your neighborhood.

** It may be necessary to revise flushing schedule dates due to unscheduled repairs*
