

Precautionary Drinking Water Warning **CANCELLED**

This is a special post-Flood announcement from the Sweetwater Springs Water District. We want you to know that your water has tested safe to drink throughout this flood event.

Sweetwater Springs Water District is announcing that the Precautionary Drinking Water Warning in effect for our Guerneville customers is CANCELLED. The Guerneville Water System has undergone and passed post-flood water tests. The Russian River has receded to more normal winter water levels, and our Guerneville well field is no longer under water.

The Precautionary Warning was issued on February 26 in anticipation of the flooding that occurred last week and inundated our Guerneville well field.
